Mini-Adductoplasty™

Minimally Invasive Midfoot Correction

Experience the Power of the Adductoplasty® System Through a 4cm Incision

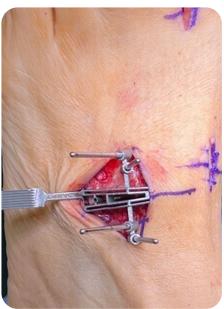

Mini-Adductoplasty™

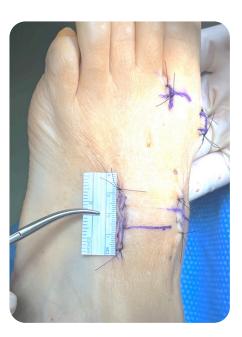

Minimally Invasive Midfoot Correction

- Minimally Invasive System
 Technology enables procedural performance through a miniaturized incision
- Familiar technique and philosophy
 Key steps and instrumented approach while maintaining tried-and-true Adductoplasty® surgical technique
- New instruments designed for procedural efficiency
 Specialized Incision Guide and Cut Guide allow procedure to be performed through a 4cm incision

Before use of the system, the surgeon should refer to the appropriate instructions for use and surgical technique for complete warnings, precautions, indications, contraindications, and adverse events. Risks include, but are not limited to: infection, pain, discomfort from the presence of the implant, loosening of the implant, and loss of correction with nonunion or malunion. If any of these occur, additional treatments may be needed. Additional information about risks, warnings, and instructions is available at Lapiplasty.com/surgeons/labeling.
